Preface -----	-----
Who is this book for? -----	v
What do you need? -----	v
What is in this book? -----	v
Trademark Attributions -----	v
Contents -----	vi
Chapter 1: Systemic View of ROBOTIS® MINI™ -----	12
1.1 Components of MINI kit-----	12
1.1.1 Hardware Controller: OpenCM9.04-C -----	12
1.1.2 Servo Motor: XL-320 (Dynamixel Concept)-----	14
1.1.3 Batteries: LB-040/041 -----	16
1.1.4 Communication Hardware: BT-210, USB & Others-----	16
1.1.5 Frame Parts & Mechanical Assembly-----	17
1.1.6 Compatible Actuators & Sensors (Port Concept) -----	17
1.2 MINI Software Tools-----	18
1.2.1 ROBOTIS Provided Software-----	18
1.2.2 ROBOTIS Partner Software-----	19
1.3 MINI Operating Configurations -----	20
1.3.1 Memory Map of OpenCM9.04-C -----	20
1.3.2 Using MOTION 3 Component -----	22
1.3.3 Using MINI Mobile App -----	26
1.3.4 Using TASK 3 Component-----	26
1.3.5 Using PLAY700 Mobile App (with TASK) -----	28
1.3.6 Using EDBOT 5-----	29
1.3.7 Using MANAGER 2 (Windows OS)-----	30
1.3.8 Using DYNAMIXEL WIZARD 2-----	30
1.3.9 Using OpenCM IDE & Arduino IDE -----	31

1.3.10 Using OLLOBOT SDK	32
1.4 Dynamixel System Design Paradigm	32
1.5 Review Questions	36
1.6 References	36
Chapter 2: Kit Assembly Tips	37
2.1 Preparations Before Assembly	37
2.1.1 Creating USB Access Slot	38
2.1.2 Firmware Update and Recovery	38
2.1.3 Dynamixel Check	39
2.1.4 Optional Sensors & Cables	39
2.2 Assembly of Head Servo	40
2.3 Mobile Device Attachment	41
2.4 Post-Assembly Troubleshooting	41
2.5 Review Questions	43
2.6 References	43
Chapter 3: Using MANAGER (Windows OS only)	44
3.1 Connection Options between PC and MINI robot	44
3.1.1 Using BT-210	44
3.1.2 Using BT-410 and BT-410 Dongle	45
3.1.3 Using Micro-USB Cable	47
3.1.4 Using LN-101	48
3.2 Main Features of MANAGER V.2	49
3.2.1 Using "Update & Test"	49
3.2.2 Using "Firmware Recovery"	55
3.3 Using MANAGER on completed MINI	57
3.4 Review Questions	58
3.5 References	58
Chapter 4: Using MOTION Tool	59
4.1 Motion Data Structure and Motion Design	60
4.1.1 Key-Frame, Time-Line & Motion-Unit	61
4.1.2 Basic Motion Design Concepts	62
4.2 Motion-Units' Flow Control with Motion-List Tool	70

4.2.1 Basic Use of Motion (List) Tool	70
4.2.2 Advanced Use of Motion (List) Tool	73
4.3 Motion Lists Organization with Motion Group	76
4.4 Servo Offset Calibration	78
4.5 Motion Creation Practicum	82
4.5.1 From "Greet 2" to "Crouching Bow 1"	85
4.5.2 From "Crouching Bow 1" to "Crouching Bow 2"	86
4.5.3 From "Crouching Bow 2" to "Crouching Bow 3"	87
4.5.4 Additional Motion-Group Examples	101
4.6 Motion Editing vs. Motion Programming	102
4.7 Review Questions	103
4.8 References	103
Chapter 5: Using MINI Mobile App	104
5.1 Transferring "MINI_Custom.mtnx" to Mobile Devices	104
5.2 Connecting to Bluetooth & Performing Actuator Test	106
5.3 Associating "MINI_Custom.mtnx" to MINI App	106
5.4 Assigning a New Button for Motion Page, is #45 "Crouching Bows"	108
5.5 Using Gestures, Voice Recognition, Messenger and Remote Controller	111
5.6 Review Questions	111
5.7 References	111
Chapter 6: Using TASK	112
6.1 Learning TASK Programming Basics	113
6.1.1 LED Control with Timer	113
6.1.2 Sequential Control of Servo Positions	115
6.1.3 Endless Loop Control of Servo Positions	118
6.1.4 Counting Loop Control of Servo Positions	120
6.1.5 Conditional Loop Control of Servo Positions with Remote Controller	122
6.2 Structure of a complete TASK program	124
6.2.1 Comment & Command Statements	126
6.2.2 Start & End Commands	126
6.2.3 Execute Statements	127
6.2.4 Loop Statements	127

6.2.5 Condition Statements-----	127
6.2.6 Function Statements-----	127
6.3 Beginner’s Approach for Robotics Projects-----	128
6.3.1 “Sense-Think-Act” Paradigm-----	128
6.3.2 Reactive-Control Approach-----	130
6.3.3 Event-Action Pairs-----	131
6.3.4 Basic Remote-Control Concepts (revisited)-----	132
6.3.5 Sensor-Actuator Pairs-----	133
6.3.6 Event-Programming Approach-----	134
6.3.7 Application to Basic RC Walker-----	134
6.3.8 TASK Support Utilities-----	138
6.4 RC Walker with Independent Servos Control-----	142
6.4.1 Filtering a RemoCon Message-----	142
6.4.2 Servo Joint Offset Special Value “1024”-----	145
6.4.3 Construction of “M_RC_Walker_IS.tsk3”-----	146
6.5 RC Smart Avoider-----	154
6.5.1 “Programmed Stoppage” of Motion-Inst Page-----	155
6.5.2 CALLBACK Function-----	156
6.5.3 Construction of “M_RC_Smart Avoider.tsk3”-----	157
6.5.4 Alternate Solution for Smart Avoider-----	165
6.6 Autonomous Random Walker-----	167
6.6.1 Using Built-In Random Number Generator-----	167
6.6.2 New “Walk Exercise” Approach-----	168
6.6.3 Basic Concepts Review-----	175
6.7 The “Mimicking MINIs”-----	176
6.7.1 Master & Slave BT-210-----	176
6.7.2 “Message Shaping” Concept-----	176
6.7.3 “Open-Loop” Solution for “Mimicking MINIs”-----	177
6.7.4 “Closed-Loop” Solution for “Mimicking MINIs”-----	180
6.8 Using MINI’s Arms as Gripper-----	184
6.8.1 “MOTION from STILLNESS” using Variable Joint-Offset-----	184
6.8.2 Application to Adaptive Grasping-----	186
6.8.3 Standard Function (SF) Solution-----	188

Copyrights CNT Robotics LLC 2020

6.8.4 <i>CALLBACK (CB) Function Solution</i> -----	194
6.9 Autonomous Dowel Scanner using DMS-80 -----	201
6.9.1 <i>Scan Background & Set Dowel Threshold</i> -----	202
6.9.2 <i>Scan & Locate Both Dowels</i> -----	203
6.9.3 <i>Relocate & Approach Closer Dowel</i> -----	208
6.9.4 <i>Relocate & Approach Remaining Dowel</i> -----	214
6.10 Review Questions -----	214
6.11 References -----	214
Chapter 7: Using PLAY700 Mobile App -----	215
7.1 Installation of R+m.PLAY700 -----	216
7.1.1 <i>Files Structure for PLAY700 App</i> -----	216
7.1.2 <i>Settings for PLAY700 App</i> -----	218
7.2 PLAY700 Project Features -----	219
7.3 “Hello World” Project-----	221
7.4 “Touch RC Walker” Project-----	225
7.4.1 <i>“Touch Areas” in R+m.PLAY700 App</i> -----	225
7.4.2 <i>“Text” Items in R+m.PLAY700 App</i> -----	226
7.4.4 <i>“Instruments Play” in R+m.PLAY700 App</i> -----	228
7.4.5 <i>Construction of “M_TouchRC_Walker_IS_SD.tsk3”</i> -----	228
7.5 “Mixed Control Walker” Project -----	236
7.5.1 <i>“Speech Recognition” and “Text-to-Speech” in R+m.PLAY700 App</i> -----	236
7.5.2 <i>Construction of “M_MixedRC_Walker_IS_SD.tsk3”</i> -----	238
7.6 “Camera Tracker” Project -----	245
7.7 Review Questions -----	253
7.8 References -----	253
Chapter 8: Using EDBOT™ Tools -----	254
8.1 Edbot - Hardware and Software Installation Requirements-----	255
8.2 SCRATCH 2 Project File Conversion -----	256
8.3 SCRATCH 2 Blocks Provided with EDBOT Software-----	259
8.3.1 <i>MOTION CONTROL Blocks</i> -----	261
8.3.2 <i>SINGLE & MULTI SERVO Blocks</i> -----	262
8.3.3 <i>SENSOR Blocks</i> -----	263

8.3.4 <i>SPEECH Blocks</i> -----	263
8.3.5 <i>GENERAL Blocks</i> -----	263
8.4 RC Walker with Independent Servo SCRATCH Project -----	264
8.4.1 <i>Differences between TASK & SCRATCH</i> -----	264
8.4.2 <i>Keyboard Solution "M_RC_Walker16_IS.sb2"</i> -----	265
8.5 Dual RC Walkers SCRATCH Project-----	268
8.5.1 <i>Simplified Version "M_Dual_RC_Walkers_M_S.sb2"</i> -----	269
8.5.2 <i>Verbose Version "M_Dual_RC_Walkers_M_V.sb2"</i> -----	274
8.6 Dual Random Walkers SCRATCH Project -----	277
8.7 Using PYTHON -----	287
8.7.1 <i>Basic Steps for PYTHON programming with EDBOT</i> -----	288
8.7.2 <i>Sensors Throughput Applications</i> -----	289
8.8 MINI PYTHON/EDBOT Applications-----	297
8.8.1 <i>RC Walker with Independent Servo Control</i> -----	298
8.8.2 <i>Dual RC Walkers</i> -----	306
8.8.3 <i>Autonomous Random Walker & Obstacle Avoidance</i> -----	311
8.8.4 <i>Dual Random Walkers with Thread Programming</i> -----	323
8.8.5 <i>Color Tracker with Web Cam using OpenCV</i> -----	330
8.8.6 <i>Dual Color Trackers with Web Cam using OpenCV & Threading</i> -----	352
8.9 Review Questions -----	367
8.10 References -----	367
