

# Using ARDUINO with ROBOTIS Systems By Chi N. Thai

## Contents

Chapter 1: Foundational Concepts	1
1.1 ROBOTIS DYNAMIXEL NETWORK	1
1.1.1 Actuators	3
1.1.2 Sensors	3
1.1.3 Communications	3
1.2 ROBOTIS-Arduino Integration	4
1.3 Machine Vision Options	6
1.4 Usage Tips	7
1.4.1 Wire Connections with Arduino Boards	7
1.4.2 Wire Connections with Dynamixels	8
1.4.3 Power Management	8
1.4.4 Sensor and Communication Ports Usage	9
1.5 Expected Programming Skills	9
1.6 References	10
Chapter 2: Using OpenRB-150	11
2.1 OpenRB-150 Features	11
2.2 Robot Demonstration Platforms	12
2.3 Software Tools	14
2.4 UART Communications	18
2.4.1 Wanting to use BT-210/410s with UART Ports	18
2.4.2 Hardware Hook Up for Serial2	18
2.4.3 Hardware Hook Up for Serial3	19
2.4.4 Software Setup for Serial2 and Serial3	20
2.4.5 RC-100 Data Flow via Serial2 and Serial3	22
2.4.6 RC-100 Data Flow via Serial4 and Serial5	26
2.4.7 Discussions	31
2.5 Actuators in Wheel Mode	31
2.5.1 Control Tables and Dynamixel2Arduino	31
2.5.2 Setting Up and Using Wheel Mode	35
2.5.3 Discussions	38
2.6 Carbot's Remote Control (RC100 vs. BLE)	39
2.6.1 Data Flow Characteristics for BLE	39
2.6.2 RC Solution with RC100 Protocol	44
2.6.3 RC Solution with BLE Protocol	50
2.6.4 Discussions	55
2.7 Tracker-Follower with ToF Sensors	56
2.7.1 Data Flow Characteristics of Multiple VL53L1Xs	57

2.7.2 Tracker-Follower using 3 VL53L1Xs	62
2.7.3 Discussions	64
2.8 Smart Avoider	64
2.8.1 Using Serial2 with 3 VL53L1Xs	64
2.8.2 Smart Avoider using 3 VL53L1Xs & Serial2	67
2.8.3 Discussions	76
2.9 Color Tracker	76
2.9.1 Using Pixy2	77
2.9.2 Using HuskyLens	85
2.9.3 Using OpenMV H7+	94
2.9.4 Discussions	107
2.10 Pan-Tilt Color Tracker	107
2.10.1 Position Control Basics	109
2.10.2 Tasks Prioritization with Duty Cycles	112
2.10.3 New & Revised Tasks in rc_car_PT()	113
2.10.4 New & Revised Tasks in target_track()	116
2.10.5 Discussions	122
2.11 Dual Controllers for Pan-Tilt Color Tracker	123
2.11.1 Tasks Prioritization with Duty Cycles	125
2.11.2 Revised Tasks & Data Flows	126
2.11.3 Discussions	132
2.12 Mobile Manipulator (MM)	132
2.12.1 MM: Remote Control	135
2.12.2 MM: Autonomous Color Tracker	141
2.12.3 Discussions	154
2.13 Articulated 4-Wheeled Platform (A4WP-H)	155
2.13.1 Sync Read & Sync Write	155
2.13.2 Time-based Position Control & Key Frame	166
2.13.3 A4WP-H: Motion Arrays	170
2.13.4 A4WP-H: Motion Programming & Remote Control	173
2.13.5 A4WP-H: Color Tracker	183
2.13.6 Discussions	186
2.14 References	186
Chapter 3: Using MKR ZERO	189
3.1 MKR ZERO Features	190
3.2 Robot Demonstration Platforms	190
3.3 Software Tools	192
3.4 UART Communications	195
3.4.1 Wanting to use BT-210/410s with UART Ports	195
3.4.2 Hardware Solution for Serial2/Serial3	195
3.4.4 Software Setup for Serial2/Serial3	196
3.4.5 RC-100 Data Flow via Serial2/Serial3	198
3.4.6 Discussions	201
3.5 Actuators in Wheel Mode	201
3.5.1 Control Tables and Dynamixel2Arduino	201
3.5.2 Setting Up and Using Wheel Mode	205
3.5.3 Discussions	208

3.6 Carbot's Remote Control (RC100 vs. BLE)	209
3.6.1 Data Flow Characteristics for BLE	209
3.6.2 RC Solution with RC100 Protocol	214
3.6.3 RC Solution with BLE Protocol	219
3.6.4 Discussions	225
3.7 Tracker-Follower with ToF Sensors	226
3.7.1 Data Flow Characteristics of Multiple VL53L1Xs	227
3.7.2 Tracker-Follower using 3 VL53L1Xs	232
3.7.3 Discussions	234
3.8 Smart Avoider	234
3.8.1 Using Serial2 with 3 VL53L1Xs	234
3.8.2 Smart Avoider using 3 VL53L1Xs & Serial2	237
3.8.3 Discussions	246
3.9 Color Tracker	246
3.9.1 Using Pixy2	247
3.9.2 Using HuskyLens	255
3.9.3 Using OpenMV H7+	264
3.9.4 Discussions	277
3.10 Pan-Tilt Color Tracker	277
3.10.1 Position Control Basics	279
3.10.2 Tasks Prioritization with Duty Cycles	282
3.10.3 New & Revised Tasks in rc_car_PT()	283
3.10.4 New & Revised Tasks in target_track()	286
3.10.5 Discussions	292
3.11 Dual Controllers for Pan-Tilt Color Tracker	292
3.11.1 Tasks Prioritization with Duty Cycles	293
3.11.2 Revised Tasks & Data Flows	294
3.11.3 Discussions	301
3.12 Mobile Manipulator (MM)	301
3.12.1 MM: Remote Control	303
3.12.2 MM: Autonomous Color Tracker	311
3.12.3 Discussions	324
3.13 Articulated 4-Wheeled Platform (A4WP-H)	324
3.13.1 Sync Read & Sync Write	325
3.13.2 Time-based Position Control & Key Frame	335
3.13.3 A4WP-H: Motion Arrays	339
3.13.4 A4WP-H: Motion Programming & Remote Control	343
3.13.5 A4WP-H: Color Tracker	353
3.13.6 Discussions	356
3.14 References	356
Chapter 4: Using OpenCM-904	359
4.1 OpenCM-904 Features	360
4.2 Robot Demonstration Platforms	362
4.3 Software Tools	364
4.4 UART Communications	367
4.4.1 Wanting to use BT-210/410s with UART Ports	367
4.4.2 Hardware Solution for Serial3	367

4.4.4 Software Setup for Serial2/Serial3	368
4.4.5 RC-100 Data Flow via Serial2/Serial3	369
4.4.6 Discussions	373
4.5 Actuators in Wheel Mode	373
4.5.1 Control Tables and Dynamixel2Arduino	373
4.5.2 Setting Up and Using Wheel Mode	377
4.5.3 Discussions	380
4.6 Carbot's Remote Control (RC100 vs. BLE)	380
4.6.1 Data Flow Characteristics for BLE	381
4.6.2 RC Solution with RC100 Protocol	386
4.6.3 RC Solution with BLE Protocol	391
4.6.4 Discussions	396
4.7 Tracker-Follower with ToF Sensors	397
4.7.1 Data Flow Characteristics of Multiple VL53L1Xs	398
4.7.2 Tracker-Follower using 3 VL53L1Xs	403
4.7.3 Discussions	404
4.8 Smart Avoider	404
4.8.1 Using Serial2 with 3 VL53L1Xs	404
4.8.2 Smart Avoider using 3 VL53L1Xs & Serial2	407
4.8.3 Discussions	416
4.9 Color Tracker	416
4.9.1 Using Pixy2	416
4.9.2 Using HuskyLens	425
4.9.3 Discussions	434
4.10 Pan-Tilt Color Tracker	435
4.10.1 Position Control Basics	435
4.10.2 Tasks Prioritization with Duty Cycles	438
4.10.3 New & Revised Tasks in rc_car_PT()	439
4.10.4 New & Revised Tasks in target_track()	442
4.10.5 Discussions	448
4.11 Dual Controllers for Pan-Tilt Color Tracker	448
4.11.1 Tasks Prioritization with Duty Cycles	449
4.11.2 Revised Tasks & Data Flows	451
4.11.3 Discussions	457
4.12 Mobile Manipulator (MM)	458
4.12.1 MM: Remote Control	460
4.12.2 MM: Autonomous Color Tracker	467
4.12.3 Discussions	480
4.13 Articulated 4-Wheeled Platform (A4WP-H)	480
4.13.1 Sync Read & Sync Write	481
4.13.2 Time-based Position Control & Key Frame	491
4.13.3 A4WP-H: Motion Arrays	495
4.13.4 A4WP-H: Motion Programming & Remote Control	499
4.13.5 A4WP-H: Color Tracker	509
4.13.6 Discussions	512
4.14 References	512
Chapter 5: Using PORTENTA-H7 Lite	513

5.1 PORTENTA-H7 Lite Features	514
5.2 Robot Demonstration Platforms	515
5.3 Software Tools	517
5.3.1 Arduino IDE	517
5.3.2 Dynamixel2Arduino (D2A) Library	519
5.4 Dual Core UART Communications	520
5.4.1 Wanting to use BT-210/410s with UART Ports	521
5.4.2 Hardware Solution for UART6	521
5.4.4 Software Setup for UART6	522
5.4.5 RC-100 Data Flow via UART6	523
5.4.6 Discussions	526
5.5 Actuators in Wheel Mode	530
5.5.1 Control Tables and Dynamixel2Arduino	530
5.5.2 Setting Up and Using Wheel Mode	534
5.5.3 Dual Core Issue with D2A Library	538
5.5.4 Discussions	539
5.6 Carbot's Remote Control (RC100 vs. BLE)	540
5.6.1 Data Flow Characteristics for BLE	540
5.6.2 RC Solution with RC100 Protocol	546
5.6.3 RC Solution with BLE Protocol	551
5.6.4 Discussions	557
5.7 Tracker-Follower with ToF Sensors	558
5.7.1 Data Flow Characteristics of Multiple VL53L1Xs	559
5.7.2 Tracker-Follower using 3 VL53L1Xs	564
5.7.3 Discussions	570
5.8 Smart Avoider	570
5.8.1 Using UART6 with 3 VL53L1Xs	571
5.8.2 Smart Avoider using 3 VL53L1Xs & UART6	573
5.8.3 Discussions	583
5.9 Color Tracker	583
5.9.1 Using Pixy2	584
5.9.2 Using HuskyLens	593
5.9.3 Discussions	602
5.10 Pan-Tilt Color Tracker	603
5.10.1 Position Control Basics	605
5.10.2 Tasks Prioritization with Duty Cycles	608
5.10.3 New & Revised Tasks in rc_car_PT()	609
5.10.4 New & Revised Tasks in target_track()	612
5.10.5 Discussions	618
5.11 Dual Cores for Pan-Tilt Color Tracker	618
5.11.1 Communications Options	619
5.11.2 Tasks Prioritization with Duty Cycles	622
5.11.3 Revised Tasks & Data Flows	623
5.11.4 PT Color Tracker with Breakout Board	632
5.11.5 Discussions	641
5.12 Mobile Manipulator (MM)	641
5.12.1 MM: Remote Control	643
5.12.2 MM: Autonomous Color Tracker	651

5.12.3 Discussions	665
5.13 Articulated 4-Wheeled Platform (A4WP-H)	665
5.13.1 Sync Read & Sync Write	666
5.13.2 Time-based Position Control & Key Frame	676
5.13.3 A4WP-H: Motion Arrays	681
5.13.4 A4WP-H: Motion Programming & Remote Control	685
5.13.5 A4WP-H: Color Tracker	696
5.13.6 Discussions	699
5.14 References	699
